**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 7 and 12-17 are provisionally rejected on the ground of nonstatutory double patenting over claims 1 and 9 of copending Application No. 10/391,148. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

3. The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both applications follow the same method of harvesting a section of a vessel from a human or animal body,

Art Unit: 3743

comprising the steps of exposing the vessel section, providing a light source, placing the light source in the lumen of the vessel, dissecting the vessel away from surrounding connective tissue, viewing the dissection of the vessel with a viewing element, cutting the vessel and removing the vessel.

4. Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. In addition, the following co-pending applications and issued patents are noted in that they appear to have similar claimed subject matter. Applicant is requested to review the claims of these applications and issued patents and make a determination as to whether any of these applications or patents recite overlapping claimed subject matter. If in fact overlapping subject matter is claimed, Applicant is required to file an appropriate Terminal Disclaimer.

6. Non-exhaustive list of possible related co-pending applications and patents:

10/165,396

6,511,494

6,558,313

6,705,986
